

LeMiCi IQ

Master Franchise Zone

Product Requirements Document

Version 1.0 | May 2025 | Status: Draft

Product	LeMiCi IQ — Master Franchise Zone
Document Type	Product Requirements Document (PRD)
Version	1.0
Status	Draft
Author	Yash Bodade, Product Management
Prepared For	Engineering & Design Teams
Last Updated	May 2025
Reference Docs	PRD_Franchise_v1.0

01 Feature Objectives & Business Problem

1.1 Business Problem Being Solved

★ Enable franchisor brands on LeMiCi IQ to offer territorial, multi-unit expansion rights to qualified investors — turning LeMiCi into India's first digital Master Franchise marketplace, not just a unit-franchise discovery platform.

LeMiCi IQ's current Franchise Marketplace connects individual franchise seekers with unit opportunities. However, a significant high-value segment is entirely unserved:

- Large investors and holding companies seeking exclusive territorial rights (state or city-level) to build franchise networks on behalf of a brand.
- Franchise brands that want to scale pan-India rapidly by appointing Master Franchisees instead of managing hundreds of unit franchisees directly.
- No platform in India currently provides a dedicated discovery, qualification, and deal-flow surface for Master Franchise opportunities.

1.2 Feature Objectives

ID	Objective
OBJ-01	Provide a dedicated Master Franchise listing surface on LeMiCi IQ, clearly differentiated from unit franchise listings.
OBJ-02	Enable franchise brands to list Master Franchise opportunities with territory scope, development obligations, and investment thresholds.
OBJ-03	Surface qualified Master Franchise seekers to brands — high-investment individuals and holding entities with the capital and operational capacity to develop a territory.
OBJ-05	Give the Admin Panel (Moderation Admin) visibility and control over Master Franchise listings — verification, status management, and application review — consistent with the Admin PRD v2.0 framework.
OBJ-06	Build a discovery flow that adapts the existing franchise user flow for Master Franchise-specific entry points, filters, and intent signals.

1.3 Success Metrics

Metric	Phase 1 (Months 1–6)	Phase 2 (Months 7–12)
Master Franchise Listings Live	50+	200+
Registered Master Franchise Seekers	500+	3,000+

Metric	Phase 1 (Months 1–6)	Phase 2 (Months 7–12)
Master Franchise Enquiries Submitted	100+	500+
Master Franchise Deals Closed (Platform-Assisted)	5+	30+
Avg. Territory Investment Value (Listing)	₹25L+	₹50L+

02 User Roles & Personas

2.1 Master Franchise Seeker

A Master Franchise Seeker on LeMiCi is a high-intent investor looking to acquire exclusive territorial rights to operate and expand a franchise brand within a defined geography. This is not a unit-franchise buyer.

Attribute	Detail
Investment Capacity	₹25 Lakhs – ₹5 Crore+ (territory fee + unit development capital)
Profile Type	HNI investors, family businesses, holding companies, experienced multi-unit franchise operators
Goals	Acquire exclusive territory, recruit sub-franchisees, build a regional franchise network, generate royalty income
Key Needs on Platform	Territory exclusivity confirmation, development schedule clarity, royalty split modelling, sub-franchisee demand data for the territory
Pain Points	No single platform aggregates Indian Master Franchise opportunities; lack of territory ROI tools; no way to verify brand's expansion credibility

2.2 Franchisor (Brand Listing Master Franchise)

An established franchise brand that wants to appoint Master Franchisees for rapid geographic expansion instead of managing individual unit franchisees directly.

Attribute	Detail
Eligibility	Brands with 5+ operating units and a documented franchise model
Goals	Find qualified territorial partners, reduce direct operational overhead, accelerate pan-India footprint
Platform Needs	Master Franchise listing page, application management, seeker qualification signals, territory management tools

03 Functional Requirements

3.1 Master Franchise Discovery & Search

★ The Master Franchise Zone is a dedicated section within the LeMiCi platform — accessible from the homepage, navigation, and contextual entry points in the Franchise Marketplace flow.

FR ID	Functional Requirement	Priority
FR-MF-01	A dedicated 'Master Franchise' tab or section is surfaced on the LeMiCi homepage and franchise category browse page, distinct from unit franchise listings.	P0
FR-MF-02	Users can search for Master Franchise opportunities using the platform's existing prompt-based and keyword search, with a 'Master Franchise' filter by activating the toggle	P0
FR-MF-03	Users can filter Master Franchise listings by: Investment Range (territory fee), Territory Scope (state, city, region), Industry/Sub-industry, sector/sub-sector, Brand Maturity (unit count), and Exclusivity Type.	P0
FR-MF-04	Master Franchise listings are displayed as distinct cards in the results grid, showing: Brand Name, Territory Scope, Minimum Territory Investment, Number of Units Required to Develop, and Verification Badge.	P0
FR-MF-05	A 'Show Local Brands Only' toggle filters for India-based Master Franchise opportunities. Voice search and prompt-based search are supported, consistent with FR in the Franchise Marketplace PRD.	P1
FR-MF-07	The platform surfaces a 'Top Master Franchise Opportunities' curated section on the Master Franchise homepage, based on engagement metrics (views, enquiries, application rate).	P1

3.2 Master Franchise Listing Page

What a Master Franchise Listing Displays

A Master Franchise listing is richer than a unit franchise listing. It must communicate the full territorial opportunity to a sophisticated, high-investment audience.

Section	Content
Brand Overview	Brand name, logo, verification badge, category, established year, total operating units, brief brand story
Territory Details	Territory scope (state / city / region), exclusivity terms, map view of available territories, current territories taken

Section	Content
Investment Details	Master Franchise fee, unit development capital per sub-unit, total estimated capital required, royalty split with franchisor (% to MF), initial franchise fee split
Development Schedule	Number of units to be opened, timeline (e.g. 10 units in 5 years), milestone obligations
Revenue Model	Master Franchisee income streams: royalty share, initial franchise fee share, direct unit profits, performance bonuses
Support & Training	Training provided by franchisor to MF, operational manuals, brand toolkits, sub-franchisee support obligations
Legal & Compliance	Franchise agreement term, renewal terms, territory protection clauses, franchisor's regulatory licences
Media Gallery	Up to 6 brand images, optional brand video
Documents	Downloadable Master Franchise brochure (PDF), FDD if available

FR ID	Functional Requirement	Priority
FR-MF-08	A Master Franchise listing page displays all sections defined above. Sections with no data are hidden gracefully	P0
FR-MF-09	An interactive Territory ROI Calculator is embedded on the listing page. Inputs: Number of Sub-Units, Average Monthly Turnover per Unit, Royalty %, MF's Royalty Share %. Output: Projected Monthly Royalty Income, Payback Period (months), 3-Year Revenue Projection.	P0
FR-MF-10	Users can submit an enquiry/application directly from the listing page via a Master Franchise Enquiry Form. See Section 3.4 for form spec.	P0
FR-MF-11	Users can bookmark/save a Master Franchise listing to their profile. Requires login.	P0
FR-MF-12	Users can share a Master Franchise listing via WhatsApp, Email, or Copy Link. Deep link is generated with preview metadata.	P1
FR-MF-13	Users can download the Master Franchise brochure PDF from the listing page. Download is rate-limited and requires a login. If available	P1
FR-MF-14	An AI Overview panel on the listing page provides: key investment summary, territory opportunity analysis, and a Q&A interface for user queries about the listing.	P1
FR-MF-15	A user can give rating to master franchise that will be recored in the internal system	P2

3.3 Master Franchise Brand Listing (Franchisor Side)

FR ID	Functional Requirement	Priority
FR-MF-16	A franchisor with an existing LeMiCi account can initiate a 'List a Master Franchise Opportunity' flow from their brand dashboard.	P0
FR-MF-17	The listing form collects all data fields defined in Section 3.2 (Territory, Investment, Development Schedule, Revenue Model, Support, Legal, Media, Documents).	P0
FR-MF-18	The franchisor must specify at least one available territory with: geography type (state/city/region), exclusivity type (exclusive/semi-exclusive), and minimum investment for that territory.	P0
FR-MF-20	The franchisor receives a notification when their listing is verified and made active, or when it is rejected with the admin's reason.	P0
FR-MF-21	Franchisor can update their Master Franchise listing after publishing. Edits trigger a re-review notification	P1
FR-MF-22	Franchisor can mark a territory as 'Taken' or 'Under Negotiation' from their dashboard, which updates the availability map and listing card in real time.	P1

3.5 AI-Powered Intelligence for Master Franchise

FR ID	Functional Requirement	Priority
FR-MF-30	Territory ROI Calculator: given user inputs (territory size, target sub-units, avg unit revenue, royalty %), the system projects: Annual Royalty Income, Development Cost Estimate, Break-Even Timeline, 3-Year Net Return.	P0
FR-MF-31	AI Overview Panel on each listing provides an auto-generated summary of the Master Franchise opportunity, pre-populated FAQs, and a custom Q&A field where users can ask questions about the listing. Consistent with Feature 2.2 in Franchise PRD v1.0.	P1
FR-MF-32	Document Upload: users can upload a Master Franchise Agreement or FDD for AI analysis. The AI extracts and surfaces key terms: royalty split, territory obligations, termination clauses, and renewal terms.	P1
FR-MF-33	Sub-Franchisee Demand Estimator: Based on the selected territory's demographic and franchise density data, the AI estimates the number of viable sub-franchisee slots available in that territory.	P2
FR-MF-34	Smart Recommendation Engine surfaces Master Franchise opportunities to users based on: stated territory preference, investment capacity, browsing history, and sector interest — adapting the existing recommendation algorithm in the Franchise PRD.	P1

04.User Flows

4.1 Master Franchise Seeker Flow

The Master Franchise seeker flow extends and adapts the existing Franchise Marketplace user flow. The same navigation entry points and UI patterns are reused.

Step	Action	Detail
1	Discovery	User lands on LeMiCi homepage or franchise category page. A dedicated 'Master Franchise' tab / banner CTA is visible. User clicks through to the Master Franchise Zone.
2	Browse & Filter	User browses Master Franchise listings. Smart Filters available: Investment Range, Territory, Sector, Brand Maturity. Voice search and prompt search are available ('Master franchise in Maharashtra under 50L').
3	Listing Detail	User clicks a listing card. Full Master Franchise listing page loads with Territory Map, Revenue Model, Development Schedule, and ROI Calculator.
4	AI Analysis	User interacts with AI Overview panel — asks questions, runs ROI calculator, optionally uploads FDD for AI analysis.
5	Bookmark / Save	User saves the listing for later. Requires login. Saved listings visible in user profile under 'My Saved Opportunities'.
6	Enquiry Submission	User clicks 'Send Enquiry / Apply'. Master Franchise Enquiry Form opens. User completes form and submits. Confirmation notification sent to user and franchisor.

4.2 Master Franchisor (Brand) Listing Flow

Step	Action	Detail
1	Initiate Listing	Franchisor accesses 'List a Master Franchise Opportunity' from their brand dashboard.
2	Fill Listing Form	Franchisor completes all mandatory sections: Territory Definition, Investment Details, Development Schedule, Revenue Model, Support, Compliance, and Media.
3	Submit for Review	Franchisor submits listing. Status enters 'Pending Review'. Admin Panel notified.
4	Admin Verification	Moderation Admin reviews listing per the verification SoP. Verifies brand credentials, checks for territory overlap, confirms development schedule plausibility.
5	Go Live	Listing set to Active by Moderation Admin. Franchisor notified. Listing visible on Master Franchise Zone.

0.5 UX & Screen Inventory

5.1 Key UI Design Notes

- Master Franchise listings are visually differentiated from unit franchise listings using a distinct badge/tag: 'MASTER FRANCHISE' in LeMiCi deep purple
- The ROI Calculator uses an interactive slider/input design consistent with the Investment Range Filter in the Franchise Marketplace PRD.
- The Territory Map is an optional Phase 2 feature; in Phase 1, territory availability is communicated via a simple text/tag list on the listing page.
- Mobile-first design: all MF screens follow the same mobile interaction patterns defined in Section 7.4 of the Franchise PRD (thumb-friendly navigation, card swipes, Floating Action Button for Enquiry CTA).

0.6 Non-Functional Requirements

ID	Category	Requirement
NFR-MF-01	Performance	Master Franchise listing pages load in under 2 seconds.
NFR-MF-02	Security	Enquiry form data (investment capacity, business background) is treated as sensitive financial data. Bank-grade encryption applies. Consistent with Franchise PRD v1.0 Section 5.2.
NFR-MF-04	Data Retention	Delisted Master Franchise data (listing, applications, territory data) is retained internally. Consistent with Admin PRD v2.0 NFR-RET-04.
NFR-MF-05	Scalability	Master Franchise zone is built on the same microservices architecture as the Franchise Marketplace. No separate infrastructure is needed.
NFR-MF-06	Accessibility	WCAG 2.1 AA compliance. All MF screens follow the accessibility guidelines in Franchise PRD v1.0, Section 7.5.
NFR-MF-07	Compliance	Financial data shared via the ROI Calculator or enquiry forms is not stored beyond session unless the user is logged in and consents.

0.7 Implementation Phasing

Phase	Timeline	Scope
Phase 1 Core MF Zone	Months 1–3	• Master Franchise Zone homepage with search, filter, listing cards • Master Franchise listing detail page (all sections, ROI Calculator) • Enquiry form and application tracking (user profile) • Franchisor listing submission flow • Admin Panel: MF listing type filter, verification, application review
Phase 2 Intelligence	Months 4–6	• AI Overview panel on MF listings • Document Upload (FDD / MF Agreement AI analysis) • Territory Availability Map (basic)
