

Association Module — Complete API Reference for Frontend

Base URL (Dev): `https://us-dev-api.lemici.com` **Entity Type Param:** All `/entities/:entityType` routes use `associations` as the `:entityType` value. **Clean URL Pattern:** Frontend can call `/api/v1/association/...` — the gateway rewrites to `/api/v1/entities/associations/...` internally.

Table of Contents

#	Category	Auth
1	Home Page	✗ No
2	Listing Page	✗ No
3	Detail Page (Public)	✗ No
4	Full Detail (Private)	✓ Yes
5	Search	✗ No

20	Memberships	✓ Yes
21	Saved Searches	✓ Yes
22	Contact Us	✗ No

1. Home Page

```
GET /api/v1/association/home
```

Auth: ✖ Not required **Description:** Returns the association homepage layout with all sections.

Response:

```
{
  "success": true,
  "data": {
    "pageId": "association_home",
    "sections": [
      {
        "type": "explore_by_industry",
        "enabled": true,
        "data": {
          "industries": [
            {
              "id": "uuid",
              "name": "Technology",
              "slug": "technology",
              "icon_url": "/AssociationImages/ExploreByIndustry/technology.svg"
            }
          ]
        }
      },
      {
        "type": "featured_business_associations",
        "enabled": true,
        "data": [
          {
            "id": "uuid",
            "association_name": "Kassia",
            "association_type": "Industry Body",
            "description": "...",
            "location": "Bengaluru,India",
            "year_of_establishment": "1949",
            "no_of_members": 12000,
            "MembershipFeeRange": {
              "FeeUnit": "INR",
              "minFee": null,
              "maxFee": null
            },
            "logo": {
              "alt": "",
              "url": "/AssociationImages/FeaturedAssociations/kassia.svg"
            },
            "tags": ["ISO 9001:2015 Certified", "Policy & Grievance Support"]
          }
        ]
      }
    ]
  },
  "metadata": {
    "generatedAt": "2026-06-15T21:54:48Z",
    "pageType": "home",
    "source": "workflow"
  }
}
```

2. Listing Page

GET /api/v1/association/listing

Auth: ✗ Not required **Description:** Returns default paginated browse results for associations.

Query Parameters:

Param	Type	Default	Description
page	int	1	Page number
limit	int	20	Results per page
industry	string	—	Filter by industry slug
location	string	—	Filter by location/city
sort_by	string	—	Sort field
sort_order	string	desc	asc or desc

Response: Same section-based structure. Key sections:

- hero — page title & description
- business_associations — array of association cards
- functions_of_business_associations — static functions list
- statistics — numbers
- business_associations_across_india — state-wise data
- featured_business_categories — category icons
- category_questions — FAQs
- recommended_business_associations — recommended icons
- key_market_insights — market data

Association Card Shape (in listing/home):

```
{
  "id": "uuid",
  "association_name": "string",
  "association_type": "string",
  "description": "string",
  "location": "string",
  "year_of_establishment": "string",
  "no_of_members": "number|null",
  "MembershipFeeRange": {
    "FeeUnit": "INR",
    "minFee": "number|null",
    "maxFee": "number|null"
  },
  "logo": {
    "alt": "string",
    "url": "string"
  },
  "tags": ["string"]
}
```

3. Detail Page (Public)

GET /api/v1/association/detail/:slug

Auth: ✖ Not required **Description:** Returns full public metadata for a single association by slug.

Response sections (in order):

Section Type	Description
association_hero_info_card	Name, logo, description, likes, rating, review_count, tags, socialLinks
association_info_grid	association_name, association_type, sector, year, legal_status, headquarters, regional_presence, website, contact
membership_section	Membership details, Eligibility, Application process
services_and_institutional_offerings	Array of {title, description}
programs_and_initiatives_section	Grouped by category (Startup_Programs, Skill_Development, etc.)
publications_section	Industry_Reports, Policy_Papers, Whitepapers, Newsletters, etc.
regional_structure_section	Governance model, HQ, jurisdiction, chapters
events_engagement_section	Flagship_Events, Conferences, Workshops, Networking, Training
compliance_policy_section	Policy consultation, Govt representation, Standards
partnership_affiliations_section	Government, International, Academic, Industry affiliations
awards_recognition_section	Awards, Partnerships, Certifications, Media
digital_presence_section	Website, Member_Portal, Knowledge_Portal, Additional_Channels
transparency_verification_section	Document availability, governance transparency

Each section has:

```
{
  "type": "section_type_string",
  "enabled": true,
  "data": { ... }
}
```

4. Full Detail (Private)

```
GET /api/v1/association/full/:slug
```

Auth:  Required (Bearer Token) **Description:** Returns full detailed view including private/admin-only fields (documents, internal notes).

5. Search

```
GET /api/v1/association/search
```

Auth:  Not required **Description:** Advanced search with filters across Elasticsearch.

Query Parameters:

Param	Type	Description
<code>query</code>	string	Free-text search keyword
<code>category</code>	string	Category slug
<code>industry</code>	string	Industry slug
<code>location</code>	string	City/State filter
<code>min_investment</code>	float	Min investment amount
<code>max_investment</code>	float	Max investment amount
<code>min_size</code>	int	Min member count
<code>max_size</code>	int	Max member count
<code>min_fee</code>	float	Min membership fee
<code>max_fee</code>	float	Max membership fee
<code>page</code>	int	Page number (default: 1)
<code>limit</code>	int	Results per page (default: 20)
<code>sort_by</code>	string	Sort field (e.g., <code>name</code> , <code>member_count</code>)
<code>sort_order</code>	string	<code>asc</code> or <code>desc</code>
<code>isFeaturedOnly</code>	bool	Filter only featured
<code>isSponsoredOnly</code>	bool	Filter only sponsored
<code>localBrandsOnly</code>	bool	Filter local brands only

Response:

```
{
  "success": true,
  "data": {
    "results": [ /* array of association cards */ ],
    "total_count": 42,
    "query_time_ms": 15,
    "applied_filters": {
      "query": "technology",
      "industry": "technology",
      "page": 1,
      "limit": 20
    }
  }
}
```

6. Autocomplete Suggest

GET /api/v1/association/suggest

Auth: ✗ Not required **Description:** Returns autocomplete suggestions for search typeahead.

Query Parameters:

Param	Type	Description
q	string	Search prefix text

7. Industries

GET /api/v1/association/industries

Auth: ✗ Not required **Description:** Returns all industries with icons.

GET /api/v1/association/industries/:slug

Auth: ✗ Not required **Description:** Returns a specific industry by slug with its associations.

8. Categories

```
GET /api/v1/association/categories
```

Auth: ❌ Not required **Description:** Returns all categories.

9. Get By ID

```
GET /api/v1/association/:id
```

Auth: ❌ Not required **Description:** Returns a single association by UUID.

10. Stats

```
GET /api/v1/association/stats
```

Auth: ❌ Not required **Description:** Returns platform-wide statistics for the association module.

11. Featured

```
GET /api/v1/association/featured
```

Auth: ❌ Not required **Description:** Returns featured/promoted associations.

12. Favorites (Like/Unlike)

Like an Association

```
POST /api/v1/association/favorite/:id
```

Auth: ✅ Required

Response:

```
{
  "success": true,
  "id": "uuid",
  "message": "Added to favorites successfully"
}
```

Unlike an Association

```
DELETE /api/v1/association/favorite/:id
```

Auth:  Required

Response:

```
{
  "success": true,
  "message": "Removed from favorites successfully"
}
```

Get User's Favorites

```
GET /api/v1/association/favorites
```

Auth:  Required

Response:

```
{
  "success": true,
  "data": [
    {
      "id": "uuid",
      "association_name": "Kassia",
      "slug": "kassia",
      "logo": "/AssociationImages/FeaturedAssociations/kassia.svg",
      "location": "Bengaluru,India",
      "favorited_at": "2026-06-15T22:00:30Z"
    }
  ]
}
```

13. Bookmarks

Add Bookmark

```
POST /api/v1/association/:id/bookmark
```

Auth:  Required

Response:

```
{ "success": true, "message": "Association bookmarked successfully" }
```

Remove Bookmark

```
DELETE /api/v1/association/:id/bookmark
```

Auth:  Required

Response:

```
{ "success": true, "message": "Bookmark removed successfully" }
```

Check if Bookmarked

```
GET /api/v1/association/:id/bookmark/check
```

Auth:  Required

Response:

```
{ "success": true, "isBookmarked": true }
```

Get All User Bookmarks

```
GET /api/v1/association/user/bookmarks
```

Auth:  Required

14. Ratings & Reviews

Submit Rating

POST /api/v1/association/:id/rate

Auth:  Required

Body:

```
{
  "rating": 4.5,
  "review": "Very helpful industry body for MSMEs."
}
```

Response:

```
{ "success": true, "message": "Review submitted successfully" }
```

Update Rating

PUT /api/v1/association/:id/rate

Auth:  Required

Body: Same as submit.

Delete Rating

DELETE /api/v1/association/:id/rate

Auth:  Required

Get My Rating

GET /api/v1/association/:id/my-rating

Auth:  Required

Get Public Reviews (No Auth)

GET /api/v1/association/:id/ratings

Auth:  Not required

Response:

```
{
  "success": true,
  "averageRating": 4.5,
  "totalReviews": 1,
  "reviews": [
    {
      "userName": "Jane Smith",
      "rating": 4.5,
      "review": "Very helpful industry body for MSMEs.",
      "created_at": "2026-06-14T15:24:00Z"
    }
  ]
}
```

15. Share Tracking

POST /api/v1/association/:id/share

Auth:  Required

Body:

```
{ "sharePlatform": "whatsapp" }
```

Response:

```
{ "success": true, "message": "Share tracked successfully" }
```

Get User Shares

GET /api/v1/association/user/shares

Auth:  Required

16. Enquiry Submission

POST /api/v1/association/:id/enquiry

Auth:  Required

Body:

```
{
  "name": "Jane Doe",
  "email": "jane.doe@example.com",
  "phone": "+919999999999",
  "message": "Interested in ordinary membership. Please send the document requirements."
}
```

Response:

```
{ "success": true, "message": "Enquiry submitted successfully" }
```

17. Onboarding (Registration)

POST /api/v1/onboarding/submit/association

Auth:  Not required (Public) **Description:** Submits a new association onboarding/registration request. Triggers the Camunda `supplier-onboarding` workflow. Admin reviews before going live.

Body:

```
{
  "associationName": "Thane Belapur Industries Association",
  "contactEmail": "tbia@tbia.org",
  "memberCount": 3000,
  "membershipFeeMin": 5000,
  "membershipFeeMax": 15000,
  "association_type": "Industry Body",
  "overview": {
    "about": "Thane Belapur Industries Association was established to represent...",
    "key_functions": ["Corporate Community", "Maharashtra Industry", "Economic Growth"]
  },
  "contact_details": {
    "office_address": "P-14, MIDC, Rabale, Navi Mumbai, Maharashtra",
    "phone_number": "022-27691978",
    "email": "tbia@tbia.org",
    "website": "https://tbia.org"
  },
  "documents": [
    { "type": "GST", "url": "https://lemici-onboarding-docs.s3.amazonaws.com/uploads/12345_gst.pdf" },
    { "type": "PAN", "url": "https://lemici-onboarding-docs.s3.amazonaws.com/uploads/12345_pan.pdf" }
  ]
}
```

Response:

```
{
  "success": true,
  "message": "Onboarding request submitted successfully and is under review."
}
```

18. Document Upload (S3)

Get Pre-signed URL

```
GET /api/v1/documents/presigned-url?fileName=gst_certificate.pdf
```

Auth:  Required

Response:

```
{
  "success": true,
  "uploadUrl": "https://lemici-onboarding-docs.s3.amazonaws.com/uploads/...?AWSAccessKeyId=...&Signature=...",
  "fileUrl": "https://lemici-onboarding-docs.s3.amazonaws.com/uploads/12345_gst.pdf"
}
```

Upload Flow:

1. Call `GET /documents/presigned-url?fileName=xxx` → get `uploadUrl` and `fileUrl`
2. `PUT` the binary file directly to `uploadUrl` (direct S3 upload, no backend)
3. Use `fileUrl` in the onboarding form submission body

19. Offerings

```
GET    /api/v1/association/:id/offerings    ← Get all offerings
POST   /api/v1/association/:id/offerings    ← Create offering
PATCH /api/v1/association/offerings/:offeringId ← Update offering
DELETE /api/v1/association/offerings/:offeringId ← Delete offering
POST   /api/v1/association/offerings/:offeringId/publish ← Publish
POST   /api/v1/association/offerings/:offeringId/unpublish ← Unpublish
POST   /api/v1/association/offerings/:offeringId/redeem ← Redeem
```

Auth:  All require authentication

20. Memberships

```
GET    /api/v1/association/:id/memberships    ← Get memberships
POST   /api/v1/association/:id/memberships    ← Request membership
PATCH /api/v1/association/memberships/:membershipId ← Update status
```

Auth:  All require authentication

21. Saved Searches

```
POST   /api/v1/association/save-search    ← Save a search
GET    /api/v1/association/saved-searches ← Get saved searches
DELETE /api/v1/association/saved-searches/:id ← Delete saved search
```

Auth:  All require authentication

22. Contact Us

```
POST /api/v1/contact
```

Auth:  Not required (Rate-limited: 50/window)

Body:

```
{
  "firstName": "John",
  "lastName": "Doe",
  "email": "john@example.com",
  "phone": "+919999999999",
  "company": "ABC Corp",
  "message": "I want to list my association"
}
```

Authentication

All protected endpoints require a **Bearer JWT token** in the `Authorization` header:

```
Authorization: Bearer <jwt_token>
```

Session-based auth (cookie) is also supported via `SessionOrJWTAuth` middleware.

Frontend → Backend Field Mapping (Cards)

Frontend JSON Key	Backend API Path	Notes
<code>id</code>	<code>id</code>	UUID
<code>association_name</code>	<code>name</code>	Name of the Association
<code>description</code>	<code>short_description</code> OR <code>description</code>	Use short for cards
<code>association_type</code>	<code>association_metadata.association_type</code>	"National", "Regional", etc.
<code>logo.url</code>	<code>logo.circle</code> OR <code>logo.square</code>	Logo URL
<code>location</code>	<code>country</code> OR joined cities	Region
<code>year_of_establishment</code>	<code>founded_year</code>	SmallInt
<code>no_of_members</code>	<code>member_count</code>	Integer
<code>MembershipFeeRange.minFee</code>	<code>membership_fee_min</code>	Decimal
<code>MembershipFeeRange.maxFee</code>	<code>membership_fee_max</code>	Decimal
<code>tags</code>	<code>association_metadata.overview.key_functions</code>	Derived values

Reference JSON Specs

Full response shape specs are available in the repo:

- **Home Page:** `docs/Plans/Association/association_home.json`
- **Listing Page:** `docs/Plans/Association/association_listing.json`
- **Individual Page:** `docs/Plans/Association/association_individual.json`
- **Actions/Interactions:** `docs/Plans/Association/association_actions.json`
- **Integration Guide:** `docs/Plans/Association/association_integration_guide.md`

Important Notes

1. **Entity Type Routing:** All routes use `/api/v1/association/...` — gateway internally maps to `/api/v1/entities/associations/...`
2. **Rate Limiting:** Public submission endpoints (`contact` , `onboarding`) are rate-limited to 50 requests per window
3. **Image Paths:** All `icon_url` and `logo.url` values are relative paths — prepend your CDN/asset base URL
4. **Null Values:** `no_of_members` , `minFee` , `maxFee` can be `null` — handle gracefully

5. **Section Toggling:** Each section has an `enabled: boolean` flag — only render if `enabled === true`
